EDUCATION

2011 – 2017 Cornell Unive

2007 - 2011

Cornell University – Ph.D. in Applied Physics, Biomedical Engineering minor, 3.90 / 4.00 (expected)

Penn State University – B.S. with Honors in Physics, Biomedical Engineering & Mathematics minors, 3.97 / 4.00

SKILLS

TECHNIQUES Data analysis • Image analysis • Computer vision • Linear regression modeling • Logistic regression modeling •

Data visualization • Science communication • Microscopy • Mechanical testing • Sterile dissection & culture

Languages, etc. MATLAB (computer vision, statistical models, data visualization) • Python (NumPy, Matplotlib, Pandas, SciPy) •

Inkscape (vector graphics) • Autodesk Inventor (3D CAD) • MS Office • HTML & CSS • LaTeX • GitHub • Tableau

RESEARCH PROJECTS

2012 - Present Custom tools and techniques to study orthopedic mechanobiology

Cornell University, Ithaca, NY

· Designed and built custom mechanical testing stage that interfaces with 1,000 FPS imaging

· Developed broadly-applicable image segmentation algorithm using MATLAB

· Analyzed large microscopy data sets over space and time (~20 x 5 GB data sets)

· Fit mixed effects linear regression statistical models to relate tissue mechanics with cellular dysfunction

· Sterilely dissected and cultured whole tissue explants

· Cultivated collaborations in biomedical engr. & veterinary medicine, to link basic science & clinical practice

2016 – Present Fracture mechanics of articular cartilage

Cornell University, Ithaca, NY

· Mentored students in experiment design, data collection, data analysis, and science communication

· Developed new method to study crack initiation in cartilage

· Applied MATLAB and Python algorithms to track and analyze samples over space and time

2015 – 2017 4D flow behavior of glass coatings

Corning Inc., Corning, NY & Cornell University, Ithaca, NY

· Managed collaboration with Corning Inc., including quarterly presentations and a final report

· Compiled and analyzed large, multi-dimensional confocal microscopy data sets using MATLAB and Python

· Developed N-dimensional Barnes objective analysis (smoothing interpolation) in MATLAB

2009 – 2011 X-ray dosimeters for diagnostic breast cancer imaging

University of Pennsylvania, Philadelphia, PA

· Designed, constructed, and studied the response of a custom x-ray dosimeter

 \cdot Modeled measurement biases of existing dosimeters using MATLAB

2008 Eliminating noise from IceCube neutrino observatory data

Penn State University, State College, PA

· Developed level-zero filter in C++ to eliminate noise from raw neutrino detector data

DATA ANALYSIS & CODING PROJECTS

2017 GUI for automated segmentation and classification of microscopy images

- · Developed custom image segmentation algorithm based on the watershed transform
- · Implemented both segmentation and classification in a portable, user-friendly GUI
- · Created training tutorial and distributed GUI to collaborators using GitHub
- · GUI has been used for data analysis in at least three projects that will submitted for publication soon

2016 WXPN radio "A to Z" marathon playlist analysis

- · Developed spider in Python to crawl the XPN website and scrape radio playlist metadata
- · Linked playlist metadata with MusicBrainz (open source music database) to find additional song data
- · Cleaned data and collected summary stats using Python (NumPy, Pandas)
- · Created interactive public visualization using Tableau and shared via Twitter (click for news coverage)

LENA BARTELL PAGE 2 OF 2

| | DATA ANALYSIS & CODING PROJECTS (CONTD.) |
|---|---|
| 2016 | N-dimensional Barnes objective analysis Extended existing 2D Barnes smoothing interpolation into arbitrary N dimensions Programed algorithm in MATLAB and utilized it in multiple other research projects |
| 2015 | Personal website (lenabartell.com) · Created website using HTML and CSS · Managed website domain, hosting |
| | Relevant Coursework |
| 2015 2015 2014 2014 2013 | Google's Python Class – Free introduction to programming with Python Computer Vision – Image data acquisition and analysis with emphasis on techniques for robot vision Finding Your Scientific Voice Workshop – Intensive presentation and public speaking workshop Business as a Second Language – Introduction to business finances, marketing, etc. for engineering PhDs Commercializing University Technology – Course on bringing science to market, for MBAs and engineers |
| | LEADERSHIP EXPERIENCE & OUTREACH |
| 2016 – 2017 2015 – 2016 2015 2014 – 2015 2009 – 2011 | Homemade microscope outreach – Design & produce module teaching high school students about imaging Student Employee – Cornell McGovern Center for Venture Development in the Life Sciences Leadership Assessment for Managers Course – Leadership exercises and self-assessment Advisory Board Member – NIH Broadening Experiences for Scientific Training program at Cornell President – Penn State University Society of Physics Students |
| | SELECT AWARDS & FELLOWSHIPS |
| 2016 - PRESENT 2012 - 2015 2011 - 2012 2011 2009 2009 2010 - 2011 2007 - 2011 | NIH Individual F31 Predoctoral Fellowship Grant NSF Graduate Research Fellowship Cornell Presidential Life Science Fellowship (1 year graduate training & stipend) Penn State Schreyer Honors College Evans Award for Research Achievement Goldwater Scholarship American Association of Physicists in Medicine Undergraduate Fellowship Penn State Department of Physics Scholarship Penn State Braddock Scholarship (4 years full tuition, room & board) RESEARCH PRESENTATIONS |
| 2015, 2017 2014, 2016 2014 2013 2011 | Podium presentation, Orthopaedic Research Society Poster presentation, Orthopaedic Research Society Podium presentation, Society of Rheology Poster presentation, Gordon Research Conference: Soft Condensed Matter Physics Podium presentation, International Association of Physics Students |
| | PATENT |
| 2017 | "Buckling technique to determine tissue engineered construct readiness," U.S. Provisional Application, pending. SELECT PUBLICATIONS |
